

Manual de despliegue en Heroku

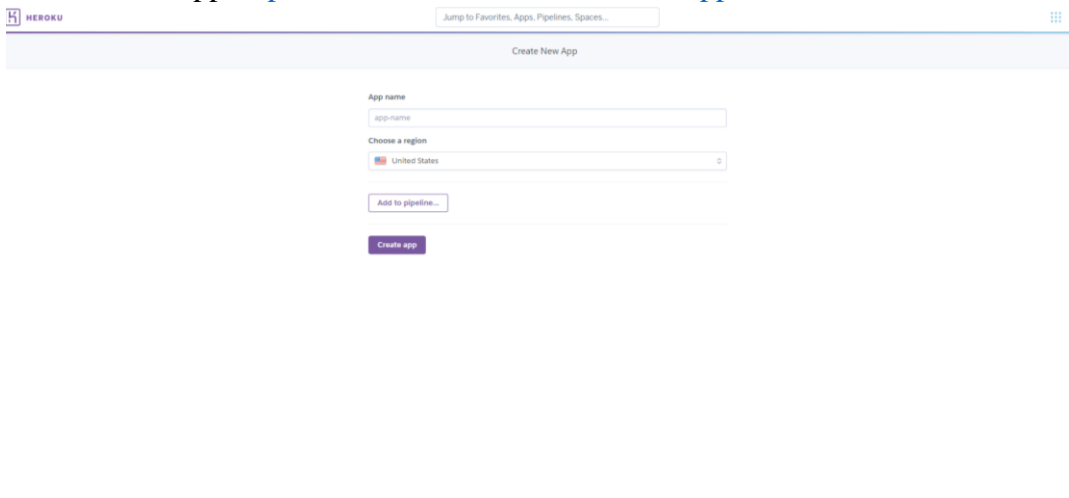

Para iniciar este proceso de despliegue debe tener el código en un repositorio de github.

En mi caso la url del repositorio es <https://github.com/DiegoGonzalezMelgarejo/modyo-test>

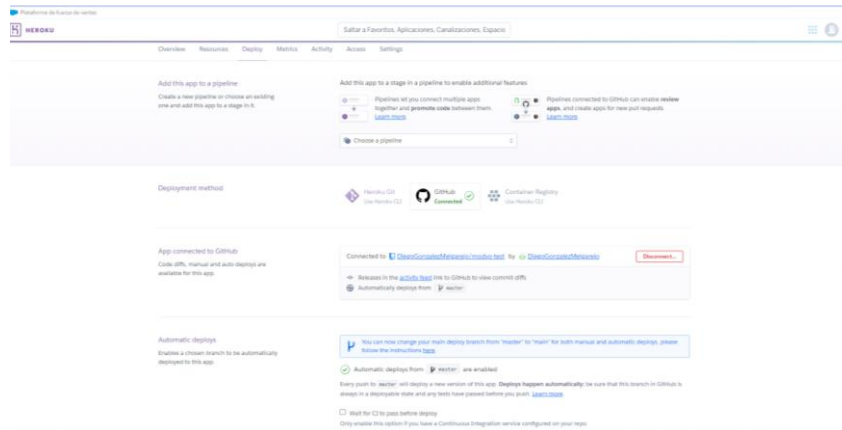

- Crear cuenta en Heroku <https://signup.heroku.com/login>

The screenshot shows the Heroku sign-up page with a dark blue background. On the left, there are three sections: 'Free account' (Create apps, connect databases and add-on services, and collaborate on your apps, for free), 'Your app platform' (A platform for apps, with app management & instant scaling, for development and production), and 'Deploy now' (Go from code to running app in minutes. Deploy, scale, and deliver your app to the world). On the right, there is a form with fields for 'First name', 'Last name', 'Email address', 'Company name', 'Role', 'Country/Region', and 'Primary development language'. There is also a checkbox for 'Do not add a bill' and a 'CREATE FREE ACCOUNT' button. At the bottom, there is a small disclaimer about signing up.

- Crear nueva App <https://dashboard.heroku.com/new-app>

The screenshot shows the Heroku 'Create New App' page. At the top, there is a search bar with the text 'Jump to Favorites, Apps, Pipelines, Spaces...'. Below the search bar, there is a 'Create New App' button. The main form has three sections: 'App name' with a text input field containing 'app-name', 'Choose a region' with a dropdown menu showing 'United States', and 'Add to pipeline...' with a text input field. At the bottom, there is a 'Create app' button.

- Conectar con el repositorio de github

• Habilitar los despliegues automáticos

Automatic deploys

Enables a chosen branch to be automatically deployed to this app.

You can now change your main deploy branch from "master" to "main" for both manual and automatic deploys, please follow the instructions [here](#).

Enable automatic deploys from GitHub

Every push to the branch you specify here will deploy a new version of this app. **Deploys happen automatically:** be sure that this branch is always in a deployable state and any tests have passed before you push. [Learn more](#)

Choose a branch to deploy

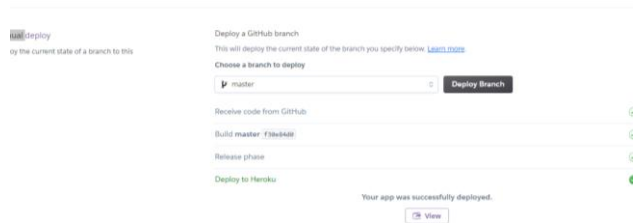

▼ master

☐ Wait for CI to pass before deploy

Only enable this option if you have a Continuous Integration service configured on your repo.

Enable Automatic Deploys

• Iniciar el Deploy

• Ir a view para ver la url del proyecto

Your app was successfully deployed.
